

Handling
refrigerants

safely

Your daily toolkit

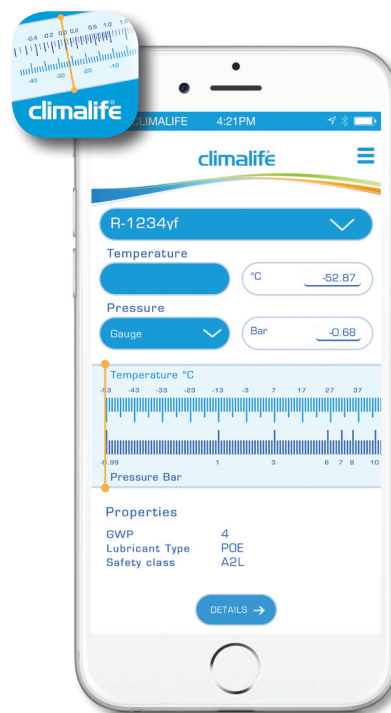

Make use of our fantastic apps when managing refrigeration installations!

Need support with F-Gas regulation?

F-Gas Solutions makes it easy for you!

- Refrigerants available on the market by application (air conditioning, heat pump, commercial cooling, etc) and by type of equipment.
- Dates at which certain refrigerants will be prohibited in the various applications.
- Value in CO2 equivalent tonnes for the refrigerants in your systems.
- Correct GWP value for the refrigerants you use.
- Leak detection frequency for your installations.
- Send table of solutions by email.
- Access to technical information on refrigerants in one click.

Need help with maintenance & operation?

P/T slider has been created just for you!

- Essential for the refrigeration and air conditioning specialist.
- Obtain the pressure-temperature relationship of refrigerants.
- Choice of relative or absolute pressure data.
- All common refrigerants on the market.
- Other characteristics available for each refrigerant: composition, temperature glide, boiling point, and molar masses.
